

**REMARKS**

This Supplemental Preliminary Amendment is being filed to correct two, small and inadvertant errors introduced with the Preliminary Amendment filed May 6, 2002. The length and apparent complexity of this document is due solely to the required protocol for making amendments and not to any length or complexity of the amendments made.

In the Remarks portion of the May 6, 2002 Preliminary Amendment (at page 64 thereof), it was pointed out that the specification description contained an error with respect to the definition of certain of the rings. Specifically, it was noted that these rings were intended to be described as being 4-6 membered saturated heterocyclic rings instead of 5-6 membered saturated heterocyclic rings, for the reasons and with the support there described. Accordingly, a number of specification amendments were presented to make this correction. However, an error in the correction made at specification page 48 was recently noted, and it was further noted that this same error had been carried into new claim 39 presented in the Preliminary Amendment.

The purpose of this Supplemental Preliminary Amendment is to correct this ring definition at specification page 48 and in claim 39, and to make it consistent with the remainder of the specification and claims. Specifically:

- At page 48 of the specification, line14, R<sup>5a</sup> was originally defined as “a 5- or 6-membered saturated heterocyclic group . . .” By the Preliminary Amendment of May 6, 2002, this was changed to read “a 4- or 6-membered saturated heterocyclic group . . .” However, as explained in the Remarks portion of the Preliminary Amendment, the intent was to have the definition refer to a 4-6 membered ring, and therefore the present specification

amendment corrects this definition of R<sup>5a</sup> to read “a 4-, 5- or 6-membered saturated heterocyclic group.” However, to make this minor amendment, has been necessary to represent the entire specification paragraph extending from page 47, line 26 through page 48, line 28, and to repeat this paragraph in the Appendix to show the amendment made. In this regard, the Examiner’s attention is called to the present Appendix at page 15, 5<sup>th</sup> line from the bottom, where the only specification change is shown by **bold underlined text.**

- Similarly, in claim 39 as presented in the Preliminary Amendment of May 6, 2002, the definition of R<sup>5a</sup> was erroneously presented as “a 4- or 6-membered saturated heterocyclic group . . .” See Preliminary Amendment at page 48, line 14-15. This is corrected by the present amendment to read “a 4-, 5- or 6-membered saturated heterocyclic group.” In this regard, the Examiner’s attention is called to the present Appendix at page 24, line 4, where the only change to claim 39 is shown by **bold underlined text.**

***Conclusion***

For the above reasons, and as explained in the Preliminary Amendment, no new matter is introduced by the above amendments. In that they simply correct an inadvertant error in the Preliminary Amendment, entry thereof is believed to be in order and is respectfully requested.

Respectfully Submitted,
